

8

Reasons **Why** Two Way Radio Can Benefit Your Organisation.

One Touch.

Two way radio offers an easy to use, one touch system via the PTT, providing instant communication even when wearing PPE.

1

Secure.

Encryption provides secure voice and data transmissions without impacting on the quality of the audio received.

2

Resilient.

Two way radio is a proven technology that remains operational throughout emergencies & major incidents when cellular networks fail and lose connection.

Protection.

With motion alarms and a prominent orange emergency button lone workers are protected, and can alert other team members when they require assistance.

4

Always On.

Intelligent battery technology helps to lengthen battery life so you can be assured your radio battery will last a full shift.

Robust.

Built to withstand any work environment. Two way radios are tested & built to withstand heat, water, dust, drops and shock.

6

Instantaneous.

Two way radio allows you to make fast & effective decisions and communicate in the way that is best suited to your organisation.

Collaborative.

Unite your teams across multiple floors & locations. Connect your radio system to mobile phones, tablets, PC's and alarm systems for complete visibility.
