

# Axon Body Mini

## Smart, Scalable Safety for the Frontline Workforce

### Protect Frontline Teams Across Every Industry

The Axon Body Mini (AB Mini) is a wearable, connected safety solution designed to support employees operating in dynamic, high-touch environments. Whether in a warehouse, facility, or sitting behind a desk, AB Mini enhances real-time visibility, streamlines incident response, and empowers both workers and leadership through Axon OS, an integrated technology platform for the needs of enterprise organizations.

Unlike static security systems or outdated panic buttons, the AB Mini supports frontline teams in the moment. It offers real-time streaming, panic activation, two-way communication, and AI tools that drive confidence, safety and compliance.

### Key Benefits for Modern Workforces

#### Enhance Worker Safety and Situational Awareness

Compact and visible, the body-worn camera helps de-escalate potential incidents while providing a direct connection to support teams. A single touch activates recording and alerts the appropriate response teams.

#### Real-Time Support Through Axon OS

Supervisors and safety staff can livestream video, view precise location data, and communicate directly with workers through secure voice channels. This information enables faster decision-making, reduces response time and improves the safety of employees.

#### AI Tools Improve Efficiency and Customer Experience

Optional AI features like real-time language translation and policy reminders improve clarity, communication, and adherence to standards in fast-paced environments.

#### Configurable for Your Teams and Brand

Choose from multiple device colors and customize the Canvas LED display for a more approachable, branded look. Mount-based auto-assignment makes it easy for staff to grab a device and get started.

#### Reliable Evidence and Legal Readiness

Video recordings include pre-event buffering and audio, making it easier to resolve incidents and securely share footage when needed.

## Features

### Integrated panic button that prompts recording

Consolidate your safety tools into one easy-to-use, connected device so your staff receive more support, faster.

### Precise location accuracy

Live streaming with precise location accuracy (5m) brings eyes onto the scene to reduce risk and make more informed safety decisions.

### Bi-directional communications

Enable support teams or leadership to communicate with frontline staff via voice, providing guidance during stressful moments.

### Axon AI Plan ready

Provide staff with AI tools like real-time policy information and language translation, facilitating better communication and adherence to organizational policies.

### Customizable Canvas LED

Allows businesses to build trust and provide a friendlier experience by customizing the Canvas LED panel, with 63 front LEDs, for their unique brand.

### 12+ hour battery life

Long-lasting battery keeps frontline staff protected across the duration of their shift with a lightweight, unobtrusive form factor.

### Mount-Based Assignment

Empower staff to grab any unassigned camera from a shared pool and instantly assign it to them by placing it on their mount—no manual setup required. Leveraging NFC-based mount recognition, this workflow accelerates shift start times and ensures all captured footage is automatically associated with the correct user upon upload.

### Training supported by Axon MetaCoach

Enable your staff with immersive, AI-powered training videos that help them practice using their body-worn camera during a variety of situations.

### Simple and secure evidence sharing

Helps resolve crimes and incidents more quickly and efficiently by securely sharing recordings with local law enforcement.

## Technical Specifications

<b>Colors</b>	Red, white, blue, dark blue, light green, dark green, grey, orange, yellow
<b>Weight</b>	100 grams (0.22 pounds)
<b>Dimensions</b>	25.5mm (Depth) x 73.1mm (Height) x 45.7mm (Width)
<b>Video Resolution</b>	1080, 720, 480
<b>Battery Life</b>	12 hours
<b>Pre-Event Buffer</b>	Configurable up to 120 Sec
<b>Connectivity</b>	Wi-Fi (5GHz and 2.4GHz), Bluetooth 5.1, and Active NFC
<b>IP Rating</b>	IP67
<b>US Military Standard</b>	MIL-STD-810H
<b>Canvas LED</b>	63 front LEDs to form customizable display
<b>Storage</b>	64 GB non-removable eMCP
<b>Encryption</b>	XTS-AES-256 full disk encryption
